Attorney Docket No. 016778/0432

#7
0604-03
SI

Applicant: Gen MOTOYOSHI
Title: CDMA COMMUNICATION SYSTEM CAPABLE OF FLEXIBLY
ASSIGNING SPREADING CODES TO A CHANNEL IN
ACCORDANCE WITH TRAFFIC
Serial No.: 09/888,393
Filed: June 26, 2003
Examiner: Unknown
Art Unit: 2661

RECEIVED
MAY 02 2003
Technology Center 2600

**INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56 and 37 CFR §1.97**

Commissioner for Patents
Washington, D.C. 20231

Sir:

Submitted herewith on Form PTO SB/08 is a listing of documents known to Applicant in order to comply with Applicant's duty of disclosure pursuant to 37 CFR 1.56. A copy of each listed document is being submitted to comply with the provisions of 37 CFR 1.97 and 1.98.

The submission of any documents herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a prima facie prior art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The instant Information Disclosure Statement is believed to be filed in accordance with 37 C.F.R. 1.97(b), prior to the mailing date of a first Office Action on the merits (first scenario). If that is not the case, such as in a second scenario in which a first Office Action on the merits has been mailed before the filing of the instant Information Disclosure Statement, then either a certification or fee is required, and a certification is provided below. If neither of the first or second scenarios is the case, such as if a final Office Action or a notice of allowance has been mailed by the PTO (third scenario), then both a certification and fee are required, and in that case a certification is provided below and also the PTO is authorized to obtain the necessary fee to have the instant IDS considered, from Foley & Lardner Deposit Account #19-0741.

CERTIFICATION

The undersigned hereby certifies in accordance with 37 C.F.R. §1.97(e)(1) that each item of information contained in this Information Disclosure Statement was first cited in a communication from a foreign patent office in a counterpart foreign application not more than three (3) months prior to the filing of this Statement.

RELEVANCE OF EACH DOCUMENT

A translation of a portion of a Japanese Office Action that issued February 12, 2003 with respect to a counterpart Japanese patent application is provided below.

"The invention related to the following claims of this application is based on inventions cited in the following publications that had been circulated prior to this application in Japan or a foreign country. Because a person having ordinary knowledge in the technical field to which that invention belongs could have easily made the invention prior to this application, a patent cannot be granted pursuant to the stipulations of Article 29, Section 2 of the Japan Patent Law.

Note

(For a list of the cited literature, see the List of Cited Literature.)

Claims: 1 through 10

Cited Literature: 1 through 5

Remarks

Described in Cited Literature 1 (Scope of Patent Claims), is a frequency spectrum diffusion communication system based on frequency hopping modulation using the same frequency band in the ascending circuit and descending circuit, wherein the number of hopping frequencies allocated corresponding to circuit quality, and the number of hops per data symbol are modulated.

When comparing the invention related to Claims 1 through 10 of the present application with the invention described in Cited Literature 1, the number of diffusion codes allocated corresponding to the traffic of the ascending circuit (and/or descending circuit) is modulated in the invention related to Claims 1 through 10 of the present application, and in contrast there is the difference that the number of diffusion codes allocated corresponding to the traffic of the ascending circuit (and/or descending circuit) is not modulated in the invention related to Cited Literature 1. However, the fact that the number of diffusion codes allocated corresponding to the traffic of the ascending circuit (and/or descending circuit) is suitably set, is nothing more than a well-known technology (for example, Claim 1, paragraph number (0060), and Figure 5 of Cited Literature 2; Claim 1 of Cited Literature 3; Claim 3 and Claim 4 of Cited Literature 4; and Claims 1 through 5 of Cited Literature 5).

Consequently, any person skilled in the art could easily obtain the configuration of the invention related to Claims 1 through 10 of the present application based on the invention described in Cited Literature 1 and the aforementioned well-known technology.

If new reasons for rejection are discovered, notification will be given of the reasons for rejection.

List of Cited Literature

1. Japanese Unexamined Patent Application Publication H9-214404 (Literature cited in the Specification of the present application)
2. Japanese Unexamined Patent Application Publication H8-274701
3. Japanese Unexamined Patent Application Publication H7-226978
4. Japanese Unexamined Patent Application Publication H11-331943
5. Japanese Unexamined Patent Application Publication H11-331123

Record of Prior Art Literature Search Results

Fields searched - IPC 7th Ed. - H04J 13/00-13/06
H04B 1/69-1/713

Prior art literature

Japanese Unexamined Patent Application Publication H11-234242 (A communication system with asymmetric ascending and descending traffic wherein the diffusion percentage, number of multiplex codes, and use time slots are separately set corresponding to the traffic ascending and descending, CDMA/TDD)

This Record of Prior Art Literature Search Results does not constitute a reason for rejection, but regarding corrections, the fact that examples of well-known technology are cited cannot be avoided."

Applicant's statements regarding the Japanese Office Action are based on a partial translation that Applicant's representative obtained. These statements should in no way be considered as an agreement by Applicant with, or an admission of, what is asserted in the Japanese Office Action.

Applicant respectfully requests that the listed documents be considered by the Examiner and formally be made of record in the present application and that an initialed copy of Form PTO SB/08 be returned in accordance with MPEP §609.

Respectfully submitted,
